

Pipe Lining Technology

Tomorrow's solution for today's challenges.

'us' – Utility Services offers a new and innovative solution to all of your service pipe water quality and leakage problems.

Using our state-of-the-art service liner, we are able to offer the safest, cleanest and highest 'life-cycle' value product for your water quality, service repair and replacement problems.

Road openings are a thing of the past. With the service lining technology provided by our highly skilled crews, boring roads to relay old services is no longer required.

Our service lining technology solves many problems and introduces significant benefits, including:

- Faster repairs to burst services
- No more copper corrosion
- Increase water quality
- Extend service life for up to 50 years
- Reduce OHS&E issues dramatically
- Applicable to all pipe materials
- Lower drag, better flow efficiency
- No road closure – reduced customer inconvenience
- Makes road openings redundant
- No risk to other authorities assets
- One visit – one fix, saves you money

Features

Our service fleet is equipped with the technology to treat service pipes from the main connection point to the water meter at the resident:

- For all size diameter up to 50mm
- Applicable to all pipe material
- Considerable time reduction
- Sections of around 20m in length in one process step

Other features include:

- Fully self-operational integrated unit
- Excavation only at mains connection point
- No impediment to local traffic flow
- Highest safety to public and employees

The Pipe Lining Technology can be ordered as a one-off job or as a program package together with our highly sophisticated Acoustic Leak Detection.
